abdourakib.com

Summary

- Machine Learning Engineer building end-to-end AI systems with Python, TensorFlow, PyTorch, and scikit-learn. Experience in computer vision, NLP, audio ML, and predictive modeling; skilled in deploying ML applications (FastAPI, React, cloud).

Education

Associate Degree in Computer Science

Community College of Philadelphia

2023 – Present

Philadelphia, USA

Internship

Machine Learning Intern

Nov 2025 – Jan 2026 · 3 months

Buildawn Labs

- Worked on projects involving computer vision, reinforcement learning, and LLMs

Projects

Brain Tumor Detection

Computer Vision, Deep Learning

TensorFlow/Keras, FastAPI, React

- Developed CNN-based brain MRI tumor classifier; implemented Grad-CAM for interpretability
- Deployed full-stack AI app with FastAPI backend and React frontend

Consumer Credit Risk Prediction

Machine Learning, Imbalanced Classification

Scikit-learn, ROC-AUC

- Built end-to-end loan default pipeline with threshold tuning and ROC-AUC optimization
- Evaluated models using precision, recall, and ROC analysis

Speech Emotion Recognition

Audio Machine Learning

MFCC, scikit-learn

- Built emotion recognition system with MFCC extraction and ML classifiers
- Implemented preprocessing pipeline for audio feature extraction

AI Computer Science Tutor

NLP, Retrieval-Based AI

FAISS, semantic search, Gradio, Hugging Face

- Developed retrieval-based AI tutor with semantic search and FAISS; Gradio interface
- Deployed on Hugging Face Spaces

Mini GPT from Scratch

Deep Learning, Transformers

PyTorch, tokenizer, self-attention

- Implemented simplified GPT-style transformer from scratch: tokenizer, self-attention, text generation
- Trained and evaluated on text completion tasks

Portfolio: github.com/Abdrakib | abdourakib.com

Technical Skills

Languages: Python, SQL, Java

Machine Learning: Scikit-learn, XGBoost, TensorFlow, PyTorch, Pandas, NumPy; computer vision, NLP, predictive modeling

Deep Learning: CNNs, RNNs, Transformers, transfer learning

Tools & Platforms: Git, GitHub, Jupyter, Colab, FastAPI, React, Vercel, Render, VS Code

Training/Course

- Andrew Ng Machine Learning Specialization (Coursera) | Data Science & ML (Udemy, 44h)

Language

Languages: English, French (Fluent)
